Trip Itinerary Survey

This survey aims to collect the responses on Trip Planning Task in real life and compare it with the developed visualization.

Name *

Danya Pradeep Kumar

Profession

Doctoral student and research assistant

Can you please tell us about your experience in Data Visualization? *

Not very experienced.

Could you please tell us the websites you use to plan a trip? *

Kayak.com, Makemytrip.com

What did you understand at the first glance of the visualization? *

I understood that the visualization represented the number of homes and rooms in each of the given neighborhoods, and also listed a set of places to eat and visit.

Did the visualization make it easier for you to plan your trip? If so how? *

Yes, it did.

Any suggestions? *

It was good, but could have been better. The distances of the eateries and the attractions to visit might have been a good addition.

Name *

Wang Tian

Profession

student

Can you please tell us about your experience in Data Visualization? *

know some of frameworks for data visualization such as D3, but not mastered

Could you please tell us the websites you use to plan a trip? *

use google and other blogs (there are some experiences and suggestions in the blogs)

What did you understand at the first glance of the visualization? *

It shows some properties (like number and bar height) for each area (like Manhattan)

Did the visualization make it easier for you to plan your trip? If so how? *

Yes. It gives me some idea in general about each interested area.

Any suggestions? *

The most I care is price, so it would be better if some price information is included

Praveen

Profession

Business consultant

Can you please tell us about your experience in Data Visualization? *

I have around 5 years experience in Utilities sector providing Data visualization solutions for various client like APS , SRP and TEPC in arizona

Could you please tell us the websites you use to plan a trip? *

Tripadvisor , Vrbo , airbn, yelp etc

What did you understand at the first glance of the visualization? *

Looking at the chart view i can tell the best places i can visit and the number of available places to stay

Did the visualization make it easier for you to plan your trip? If so how? *

Yes , I dont need to go numerous websites as i can get all info using this website . My search reduced from 5 websites to 1

Any suggestions? *

It would be Great if we can have map view plotting the accommodations within x mile radius in addition to the chart view
